Python 2 Homework 6

Tkinter is a useful package for gui styling and also interactive games using canvas.

The Homework is to make a rectangle painter using simple logic and a class.

Requirements:
- You must print out the Coordinates of the user's mouse-click in (x,y) format
- You must be able to click on two different places on the canvas and draw a rectangle.

Challenge:
- Make the rectangles print out in different colours

Ultra Challenge:
- Instead of rectangles, let the user create polygons, using a combination of left click and right click.
