Python 2 Homework (Due Jun 06)

Back to using our old friend Turtle again.

The homework is to create the racing turtles again, but this time in python locally instead of on trinket.

You will have to change a few things to make your trinket code (if you still have it) work locally.

Some requirements are:
- A start line
- A finish line
- At least 2 turtles racing
- Displaying who wins at the end of the race.

Should be a decent challenge for you.
